Campus Nursery School: A Home Away From Home

The main objective of pre-primary education is to present an environment to children to develop a healthy mind through constructive activities and informal learning experiences. This environment also prepares children for a later day primary education by enabling them to adjust to the surroundings outside their home. Pre-primary education helps develop the physical and mental development of the children, promotes their emotional and educational development, and smoothes their socialization (social development) process. A giant leap towards offering such a kind of education is the foundation of the Campus Nursery School which has a participatory governing body consisting of the management, teachers and parents.

We, at Campus Nursery School, do not focus on any kind of formal teaching or learning. Our prime objective is the psychological development of the children. The activities of our school are designed to cater to the interest and the needs of the children. Free-play, story sessions, music and dance, acting, drawing and painting, creative work and nature study are integral parts of our learning pattern.

A child who is already a member of a family learns to become a member of society through the process of socialization in which language plays a very important role. Many parents send their children to English medium nursery schools, because in their view early exposure to English will give them an edge in this competitive world. Keeping this in mind, we strive hard to create such an atmosphere wherein the little ones constantly listen to English language, be it in the form of stories or rhymes. All these facilities together have made the Campus Nursery School a 'Home Away From Home.'

Dear Children

Look at the colours of the butterfly; And all the colours appear within seconds.

Time gave birth to a tree in the womb of the earth; And the tree has its own leaves, flowers and fruits.

We all belong to the seed of the universe.

You have to come out of the frozen dark chamber, And you are born free to dance on the floor of colourful rainbow.

You may touch the moon because God trusts you; And that's why once again he is taking birth inside you.

Prof. Subroto Mondal
Vice President
Campus School Society

At Campus Nursery School, we understand the importance of early childhood education and its impact on a child's future success. The school is dedicated to provide a nurturing and stimulating environment where children can grow, learn, and thrive. We believe that every child is unique and deserves an education that caters to their individual needs. Our experienced and qualified teachers are committed to creating a safe, supportive, and inclusive environment that encourages social, emotional, cognitive and physical development.

The school has a comprehensive curriculum which is designed to promote holistic development, incorporating: play-based learning to foster creativity and problem-solving skills; literacy and numeracy skills through interactive and engaging activities; science, art, music and science activities to stimulate curiosity and exploration; social skills development through group activities and role-playing; emotional intelligence and self-awareness through storytelling and other such activities

The school provides a conducive learning environment: spacious classrooms; well-equipped play areas for outdoor and indoor play; reading corners for children; art and craft stations; hygienic and secure surroundings.

Beyond academics, school offer various activities to enrich the child's experience: music and dance sessions; yoga and mindfulness exercises; story-time and puppet shows; field trips and outdoor excursions; celebrations of festivals and other important days and cultural events. Child's safety and well-being is of utmost importance to us: secure entry and exit points with trained security personnel; First-aid facilities; regular health check-ups. Continuous parent-teacher communication is also one of the salient feature of Campus Nursery School. Excellence in early childhood education is our commitment.

I extend my very best wishes to children, teachers, parents and staff for the forth coming session.

Prof. Shubha Dubey
Hony. Secretary
Campus School Society.

"Every child is a unique treasure, waiting to shine." At Campus Nursery School, we believe that each child brings a special gift to the world. Our mission is to nurture these gifts and help every child discover their potential in an environment full of joy, safety, and creativity. We understand that the early years are the foundation of lifelong learning, and our focus is to cultivate curiosity and confidence. We celebrate each child's individuality and encourage them to express themselves freely, understanding that each child learns in their own way. With dedicated teachers and a supportive community, Campus Nursery School strives to help children become confident learners and responsible individuals. We view children not just as students, but also as future

leaders, artists, and thinkers who will add immense value to our society. As Dr. Seuss wisely said, "Children want the same things we want. To laugh, to be challenged, to be entertained, and delighted." At Campus Nursery School, we are proud to be part of each child's journey, helping them take their first steps toward a bright future. Our commitment is to make sure every child feels treasured and understood, ready to make their unique mark on the world.
